**Subject:** C2B2 Summer 2017 REU Program

The Colorado Center for Biorefining and Bioproducts (C2B2) is a research and education consortia that mobilizes student academic researchers and industry partners for the advancement of renewable bioenergy technologies.

Join C2B2 in the Rocky Mountains this summer for the 9<sup>th</sup> annual Research Experience for Undergraduates Program (C2B2 NSF/REU). The program will run May 20 to July 29, 2017!

Participants in this program will be researching biotechnology, bioproducts and biorefining through our research thrusts:

- Feedstock Engineering, Plant Biotechnology and Crop Science
- Biochemical and Thermochemical Conversion
- Process and Product Engineering
- Lifecycle Assessment and Economic Viability

**All Majors are eligible to apply!**

Biology, Chemistry, Chemical & Biological Engineering, Crop Sciences, Economics, Mathematics, Mechanical Engineering, Physics & MORE

**Research** fundamental scientific challenges of renewable energy. **Work** with research mentors at one of four C2B2 sites:

University of Colorado Boulder  
Colorado State University  
Colorado School of Mines  
National Renewable Energy Laboratory
