Subject: Now accepting application for summer 2023 internships!

Now Accepting Applications for the 2023 Repperger Research Intern Program

This 10-week educational internship program posthumously honors Dr. Daniel W. Repperger, who mentored many young people during his 35-year research career with the Air Force Research Laboratory (AFRL), by providing research opportunities for students to participate in research projects at one of the Air Force facilities under the mentorship of an AFRL scientist. Each scientist has been selected to mentor, because of their technical knowledge, experience, and willingness to help science and engineering students enhance their learning through participation in an actual Air Force research project.
